## What's New in the?

The hidden folder "AppData\Local\Microsoft\Windows\Pictures\Adjusting\Metadata" is created everytime you change the image or icon set file (bitmap image sets), if you create a.ABK from the folder, most of the time a reset will be needed in order for the set to be applied correctly. Once you have an.ABK you can use the.ABK folder (Create > ABK Folder) to apply your custom ABK to any folder. This is really useful as you can apply the same image or icon set to any folder. Author description: Lukas aka slapfoamer1 VladFrees has developed this tool based on my enhancement request, so if you like the tool, please upvote it. For version 1.2: I have fixed the loading order for the lock icons, I added "Windows Live Writer Icon" (32x32) Bugfixes: Bugfix: if your icon set is corrupted you will need to "add icon" again Bugfix: if you delete the folder and recreate it again or reset the folder it will need to be recreated Bugfix: Fix not cleared in spanish, and other minor fixes Download links: For previous versions: Review "SlapFoamer1Tools\_v1.2\_86a.zip" for more details. Permissions: This tool is released under GNU General Public License v2+ in the hope that it can be used for personal & commercial use. I am asking that anyone who uses this tool to upvote and rate it when finished. Image Updater 6.8.0 - Kupfish for KDE Image Updater 6.8.0 - Kupfish for KDE This is
